- Overweighting a market segment without additional cash

Past performance does not guarantee future results. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Performance data current to the most recent month-end is available at Profunds.com or by calling 1-888-776-3637.

For standardized returns year-to-date, and as of the most recent calendar quarter-end, and annualized month-end, see performance. Returns include the reinvestment of dividends and capital gains.

¹Contractual waiver effective until November 30, 2024. Without such a waiver of fees, the total returns would have been lower.

Index description																																				
<p>The MSCI EAFE Index (Bloomberg symbol: MXEA) includes 85% of free float-adjusted, market capitalization in each industry group in developed market countries, excluding the U.S. and Canada. As of June 20, 2019, the Index consisted of the following 21 developed market country indexes: Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland and the United Kingdom. It is not possible to invest directly in an index. Because the level of the Index is not computed as of the close of the U.S. securities markets due to differences in trading hours between U.S. and foreign markets, correlation to the Index will be measured by comparing the daily change in the Fund's net asset value per share to the performance of one or more U.S. exchange-traded securities or instruments that reflect the values of the securities underlying the Index as of the close of the U.S. securities markets.</p>	<h3 data-bbox="594 100 837 132">Top index companies</h3> <table border="1" data-bbox="594 132 1552 533"> <thead> <tr> <th data-bbox="594 132 1429 163"></th> <th data-bbox="1429 132 1552 163">Weights</th> </tr> </thead> <tbody> <tr><td data-bbox="594 163 1429 195">Novo Nordisk A/S-Class B</td><td data-bbox="1429 163 1552 195">2.46%</td></tr> <tr><td data-bbox="594 195 1429 226">ASML Holding NV</td><td data-bbox="1429 195 1552 226">2.30%</td></tr> <tr><td data-bbox="594 226 1429 258">Nestle SA</td><td data-bbox="1429 226 1552 258">1.68%</td></tr> <tr><td data-bbox="594 258 1429 289">Toyota Motor Corp.</td><td data-bbox="1429 258 1552 289">1.57%</td></tr> <tr><td data-bbox="594 289 1429 321">LVMH Moet Hennessy Louis Vuitton SE</td><td data-bbox="1429 289 1552 321">1.47%</td></tr> <tr><td data-bbox="594 321 1429 352">Shell plc</td><td data-bbox="1429 321 1552 352">1.27%</td></tr> <tr><td data-bbox="594 352 1429 384">AstraZeneca plc</td><td data-bbox="1429 352 1552 384">1.24%</td></tr> <tr><td data-bbox="594 384 1429 415">SAP SE</td><td data-bbox="1429 384 1552 415">1.20%</td></tr> <tr><td data-bbox="594 415 1429 447">Novartis AG</td><td data-bbox="1429 415 1552 447">1.18%</td></tr> <tr><td data-bbox="594 447 1429 478">Roche Holding AG</td><td data-bbox="1429 447 1552 478">1.06%</td></tr> </tbody> </table>			Weights	Novo Nordisk A/S-Class B	2.46%	ASML Holding NV	2.30%	Nestle SA	1.68%	Toyota Motor Corp.	1.57%	LVMH Moet Hennessy Louis Vuitton SE	1.47%	Shell plc	1.27%	AstraZeneca plc	1.24%	SAP SE	1.20%	Novartis AG	1.18%	Roche Holding AG	1.06%

International investments may involve risk from unfavorable fluctuations in currency values, differences in generally accepted accounting principles, and from economic or political instability.

Many ProFunds seek daily investment results that correspond, before fees and expenses, to a multiple (e.g., 2x, -2x) of the daily performance of its underlying benchmark (the "Daily Target"). While these Funds have a daily investment objective, you may hold Fund shares for longer than one day if you believe it is consistent with your goals and risk tolerance. For any holding period other than a day, your return may be higher or lower than the Daily Target. These differences may be significant. Smaller index gains/losses and higher index volatility contribute to returns worse than the Daily Target. Larger index gains/losses and lower index volatility contribute to returns better than the Daily Target. The more extreme these factors are, the more they occur together, and the longer your holding period while these factors apply, the more your return will tend to deviate. Investors should consider periodically monitoring their geared fund investments in light of their goals and risk tolerance.

ProFunds are not suitable for all investors because of the sophisticated techniques the funds employ. Investing involves risk, including the possible loss of principal. ProFunds entail certain risks, including risk associated with the use of derivatives (swap agreements, futures contracts and similar instruments), imperfect benchmark correlation, leverage and market price variance, all of which can increase volatility and decrease performance. For more on correlation, leverage and other risks, please read the prospectus. There is no guarantee any ProFund will achieve its investment objective.

All ProFunds are subject to active investor risk. There are no restrictions on the size and frequency of trades and no transaction fees. The frequent exchanges our policies permit can decrease performance, increase expenses and cause investors to incur tax consequences.

Carefully consider the investment objectives, risks, charges and expenses of ProFunds before investing. A prospectus or summary prospectus with this and other information may be obtained at Profunds.com or by calling 1-888-776-3637. Read them carefully before investing.
